**You'll Love that Valve!** The secret to the extraordinary comfort of this cushion is the valve. Customize your comfort to your scooter seat or any other seating area outside the wheelchair.

ROHO® Shape Fitting Technology® makes the difference. **The ROHO difference.** The easy-twist valve tailors the support to your needs precisely, and an active network of dynamic comfort cells adjust instantly and shape to your contour no matter how you move. Lightweight. Easy to fold, you can take anywhere!

## Enjoy Convenience, **Portability, Comfort & Safety** Wherever You Go!

While Traveling

The Great Outdoors

In Any Car

At The Office

### Comfort

Adjustable interconnected air-filled cells redistribute your body weight. Padded cover adds an extra level of comfort.

### Take it anywhere!

Lightweight design makes it easy to fold and carry your LTV seat cushion from car to office to stadium to plane - anywhere your busy life takes you. Works great as second cushion for use in your automobile.

### Adjust it how you want it

As you have come to expect from ROHO, an easily accessible valve allows you to adjust the air level to one that works best for you.

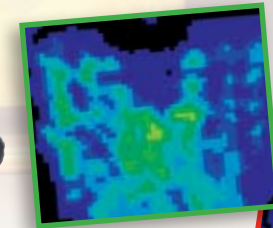

### Designer Covers

Choose from three cover models, whichever best coordinates with your personal style.

ROHO Shape Fitting Technology®

Seated on your scooter  
*with* ROHO's LTV-Cushion

Seated on your scooter  
*without* the LTV-Cushion

Medically proven pressure mapping illustrates the difference. Red and yellow areas show painful pressure points. The LTV Cushion significantly redistributes pressure and maximizes comfort.
