

THE AIRHAWK REVOLUTIONARY COMFORT SEATING SYSTEM

PREMIUM QUALITY. BUILT TO LAST.

Each AIRHAWK is handcrafted from soft, pliable, non-hardening material (neoprene for AIRHAWK Pro, polyvinyl for AIRHAWK) and features a breathable, stretchable nylon/lycra blend outer cover, and a non-skid vinyl base. Built in the U.S.A.

NO MORE NUMBNESS AND PAIN

Based on 30 years of product development within the rehabilitation industry, AIRHAWK's design promotes consistent blood flow which reduces numbness and pain. Air-filled cells absorb road vibrations which cause spinal cord compression and lower back pain.

COMFORT SEATING FOR YOUR SHAPE

The only seat system that's truly "one size fits all." AIRHAWK Comfort Seating Systems are designed to perfectly match your body shape and contour, eliminating pressure points. The unique patented ISOFLO™ Memory Control™ on the AIRHAWK Pro offers shape fitting capabilities while the driver is seated, allowing quick and easy on-demand adjustment.

UNSURPASSED COMFORT

Totally new and medically proven design assures constant comfort, from the first mile to the last. Soft, pliable cells and a cushion of air never harden like foam seats.

DON'T PUT YOURSELF AT RISK

Years of driving can add up to health and safety problems. AIRHAWK can significantly help reduce the risk of long-term driving and related injuries.

Comfort Seating for Your Shape

AIRHAWK Shape Fitting Technology® is designed to perfectly match body, shape and contour. By distributing pressure over the seated area, blood flow is enhanced achieving your precise level of comfort. For over 30 years, this medically-proven dynamic comfort system has improved the quality of life by providing comfort and protection, whether in a wheelchair, motorcycle, or the cab of a big rig.

NO MATTER WHAT YOU'RE DRIVING, AN AIRHAWK CAN MAKE IT EASIER ON YOU.

AIRHAWK has been proven to take the wear and tear off any extended driving time. Whether it's a few thousand miles or across town in heavy traffic. AIRHAWK can be used in:

**THERE'S A LOT MORE
RIDING ON YOUR SEAT
THAN YOU THINK.**

**GET THE SOLUTION
TRUSTED BY THE
MEDICAL PROFESSION.**

We all know sitting for long periods can make you sore and stiff. But did you know that it can also significantly affect your health and safety?

In an average driver's seat, pressure points build where you make contact with the seat, cutting off your blood supply to your buttocks and legs and increasing the risk of circulatory problems.

And no matter how soft the seat is, your weight will compress and stiffen the foam, which removes any shock absorbing benefit. So what absorbs the shock then? Your spine.

And because you're basically balancing on two pressure points (where your posterior makes contact with the seat), your back becomes tired from trying to keep your body stable.

No wonder we always hear drivers say, "My backside is killing me!"

The AIRHAWK® Comfort Seating System reduces numbness and fatigue—and health risks—by virtually eliminating the pressure points that caused them.

The secret is AIRHAWK Shape Fitting Technology®. Each AIRHAWK Comfort Seating System is made up of individual, interconnected air cells that allow air to slowly transfer from chamber to chamber and evenly distribute body weight pressure.

In other words, no more pressure points! This technology has been used since 1973 by the medical industry to treat wheelchair users and patients who are confined in bed for long periods. In fact, AIRHAWK's technology is so unique that it is currently being distributed in over 65 countries around the world.
